**Structure Impact by Type — NWCC / ICS-209 Live Data**

| Structure Type | Threatened (Active) | Damaged (YTD) | Destroyed (YTD) |

| **Total** | — | — | 207 |

*Source: NWCC Large Fire Public Information (ICS-209 filings), matched onto WFIGS incident records. Type breakdown parsed from NWCC's Structure_Threat/Structure_Damaged/Structures_Destroyed2 free-text fields; small fires may not file until significant impact. "Uncategorized" is a bare NWCC number with no descriptive text — added 2026-08-01 to stop those from being silently counted as residences (NWCC's free text isn't reliable enough to assume a category when it doesn't say one). Reconciliation note (2026-11-03): Residence counts reflect the last figures NWCC reported via ICS-209 while each fire was active. Some outlets report a higher statewide total (56 residences per OPB, citing NWCC); agencies define and finalize counts differently (the Oregon State Fire Marshal counts primary residences only). Figures are under review and may be revised.*

*Methodology note (effective July 19, 2026): Fires without a confirmed fuel type that do not otherwise meet large fire criteria — fewer than 300 acres, no evacuation order, no IMT assigned — are excluded from this listing, active fire counts, and acreage totals. Fires that subsequently trigger an evacuation, receive an IMT, or exceed 300 acres are included automatically. Statistics prior to July 19, 2026 reflect the previous definition (unknown fuel type defaulted to the 100-acre timber threshold).*

## 2. LARGE FIRES LOG — YEAR TO DATE

**Large Fire (NWCC definition):** Any wildland fire in timber ≥100 acres or in grassland/rangeland ≥300 acres; or any fire with an Incident Management Team (IMT) assigned; or any fire that has triggered any level of evacuation. Fires with unknown or unspecified fuel type require ≥300 acres to qualify.

*† Structure loss count held at previously reported value pending manual verification. WFIGS reported a significant drop that may reflect complex restructuring, child-fire reassignment, or data entry errors rather than a real correction. Affected: Grasshopper. To accept: add fire id to wildfire_data/structure_overrides.json.*

*Structure counts for 13 contained fire(s) are the last values NWCC reported while each fire was active. NWCC no longer lists these fires, so later revisions are not captured automatically; verified final counts are entered manually when available.*

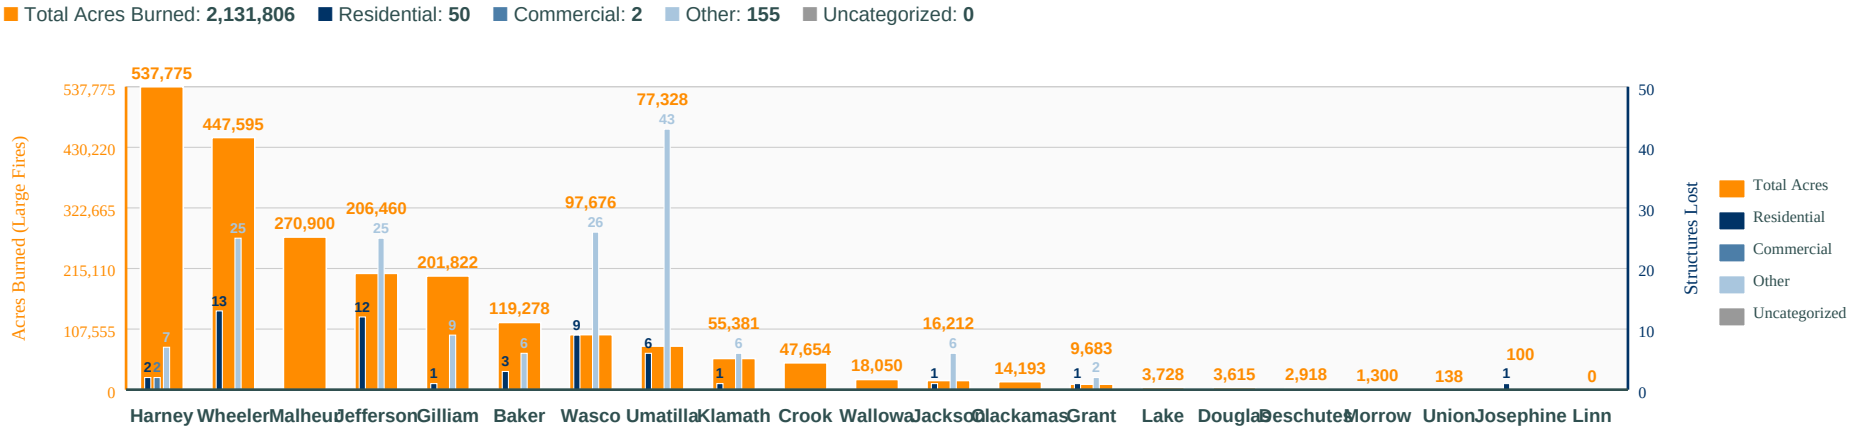

*‡ Acreage held at previously reported value pending manual verification. WFIGS reported a significant drop that may reflect a preliminary/corrected perimeter re-survey, complex restructuring, or data entry errors rather than a real reduction in fire size. Affected: Lower Dry Creek Mutual Aid, Sycan. To accept: add fire id to wildfire_data/acres_overrides.json.*

*§ Fire spans the Oregon/Idaho border. The Acres column shows the fire's total reported size; only the Oregon portion is counted toward Total Acres YTD and county acreage totals. BIG GRASS: 186,809 of 578,637 acres in Oregon.*
