5. FIRE WEATHER CONDITIONS

Contrasting fire weather conditions define Oregon on April 15, 2026: a Pacific winter storm is delivering heavy snow to the Cascades and rain to western Oregon, while active Red Flag Warnings are in effect for South-Central Oregon (Lake/Harney Counties, Burns BLM and Southern Grasslands) and the Southern Oregon Klamath Basin, where minimum relative humidity is falling to 12% with northwest winds of 10–20 mph and thunderstorm outflow gusts up to 50 mph. Active fires have jumped to 15 statewide — up from 10 yesterday — with 900.31 acres burned YTD, reflecting accelerating fire activity across critically dry interior Oregon despite the wet pattern in the west. A record-low snowpack season (one-third of normal statewide) continues to drive elevated fuel aridity.
